The Easy Lid

A revolutionary concept

Easy Lid is a top seal container where the top seal foil itself doubles as lid.

The concept that will change the world

The Naber Easy Lid System makes an extra lid unnecessary in topseal packaging by using a two phase seal technique!

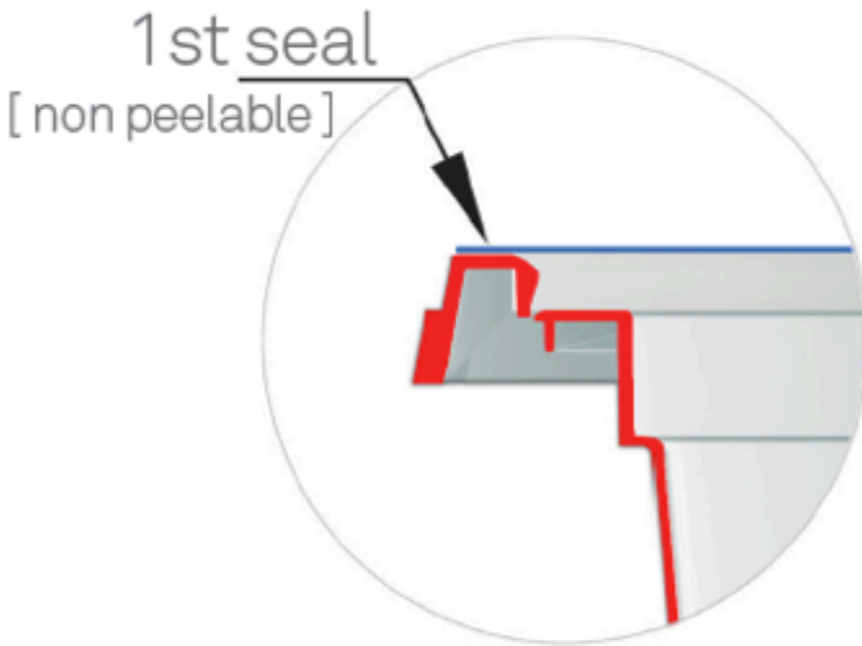

This offers big advantages in the entire chain!

How it works

seal in 2 steps

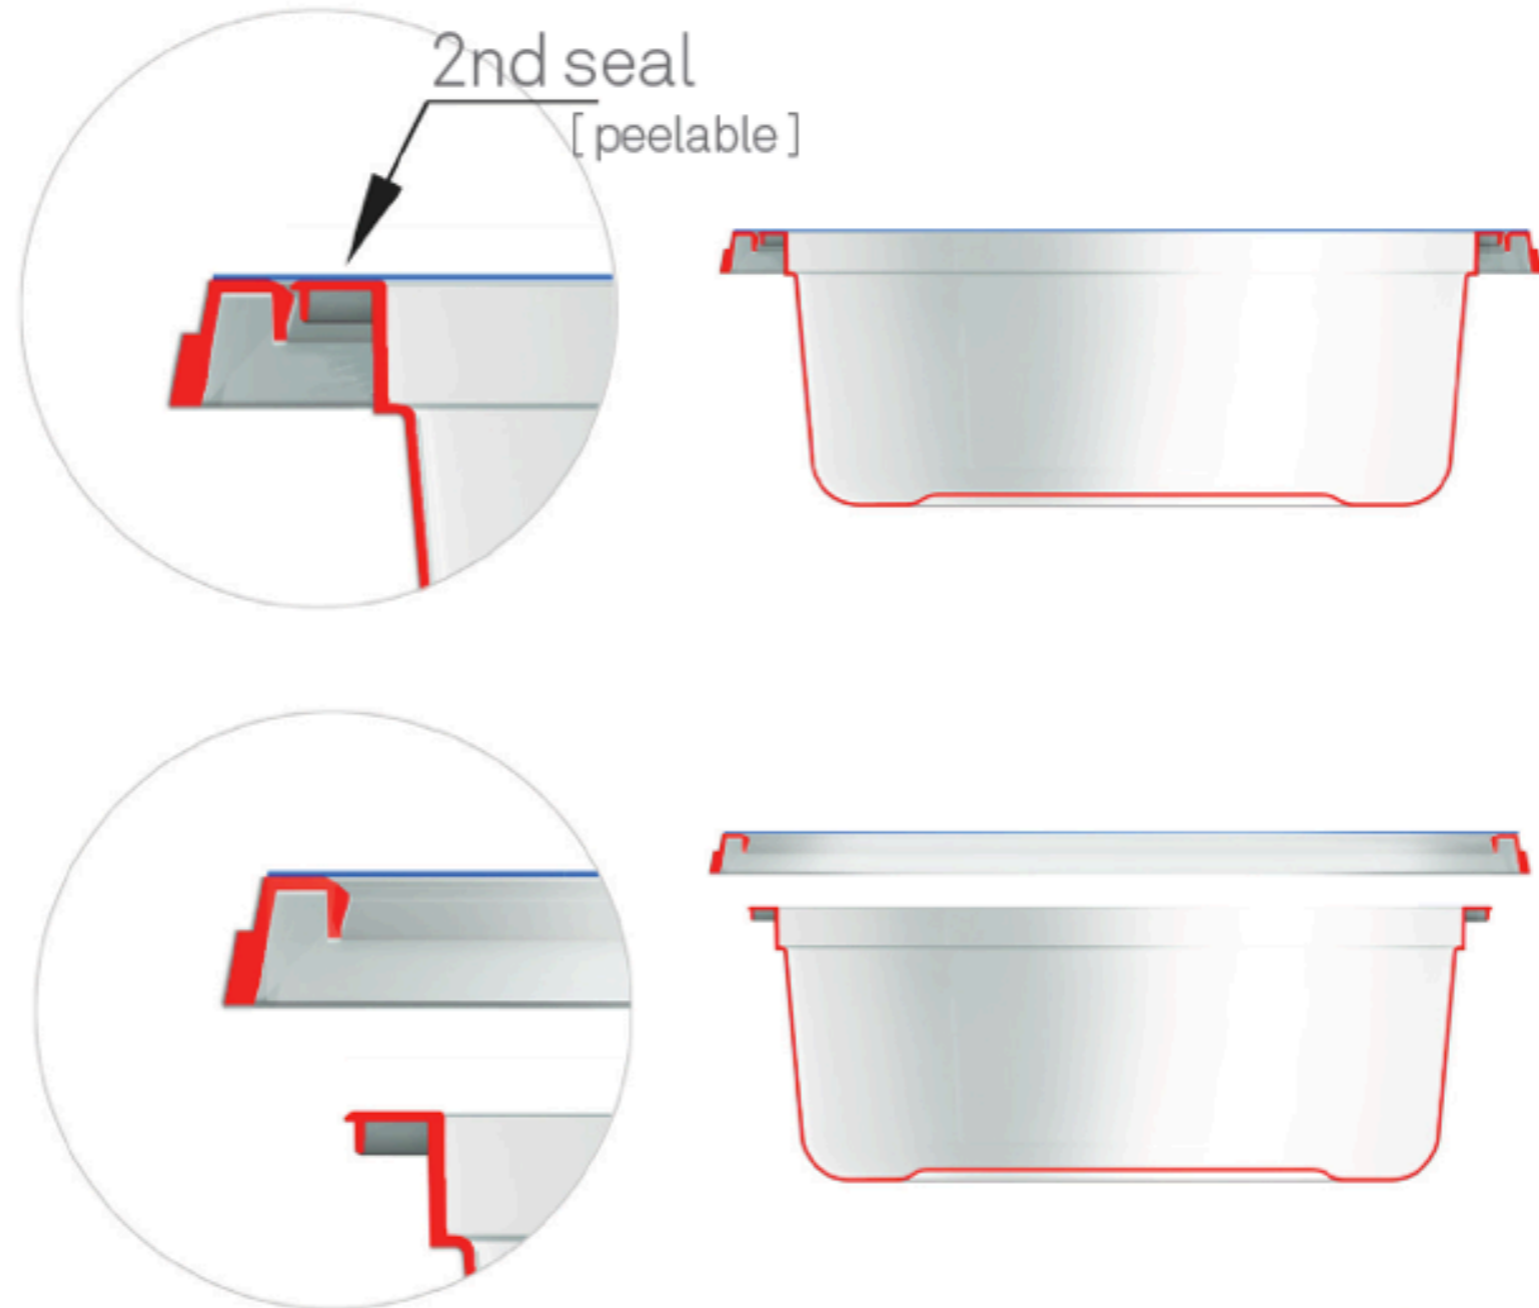

step 1:
1st seal

How it works

seal in 2 steps

step 2;
2nd seal + lid

Forming Innovations

Current market

- cookies, fresh meals, spreads, tapas, etc..

Benefits retailer

Very clear lid in transparent packaging

Naber
injection moulding

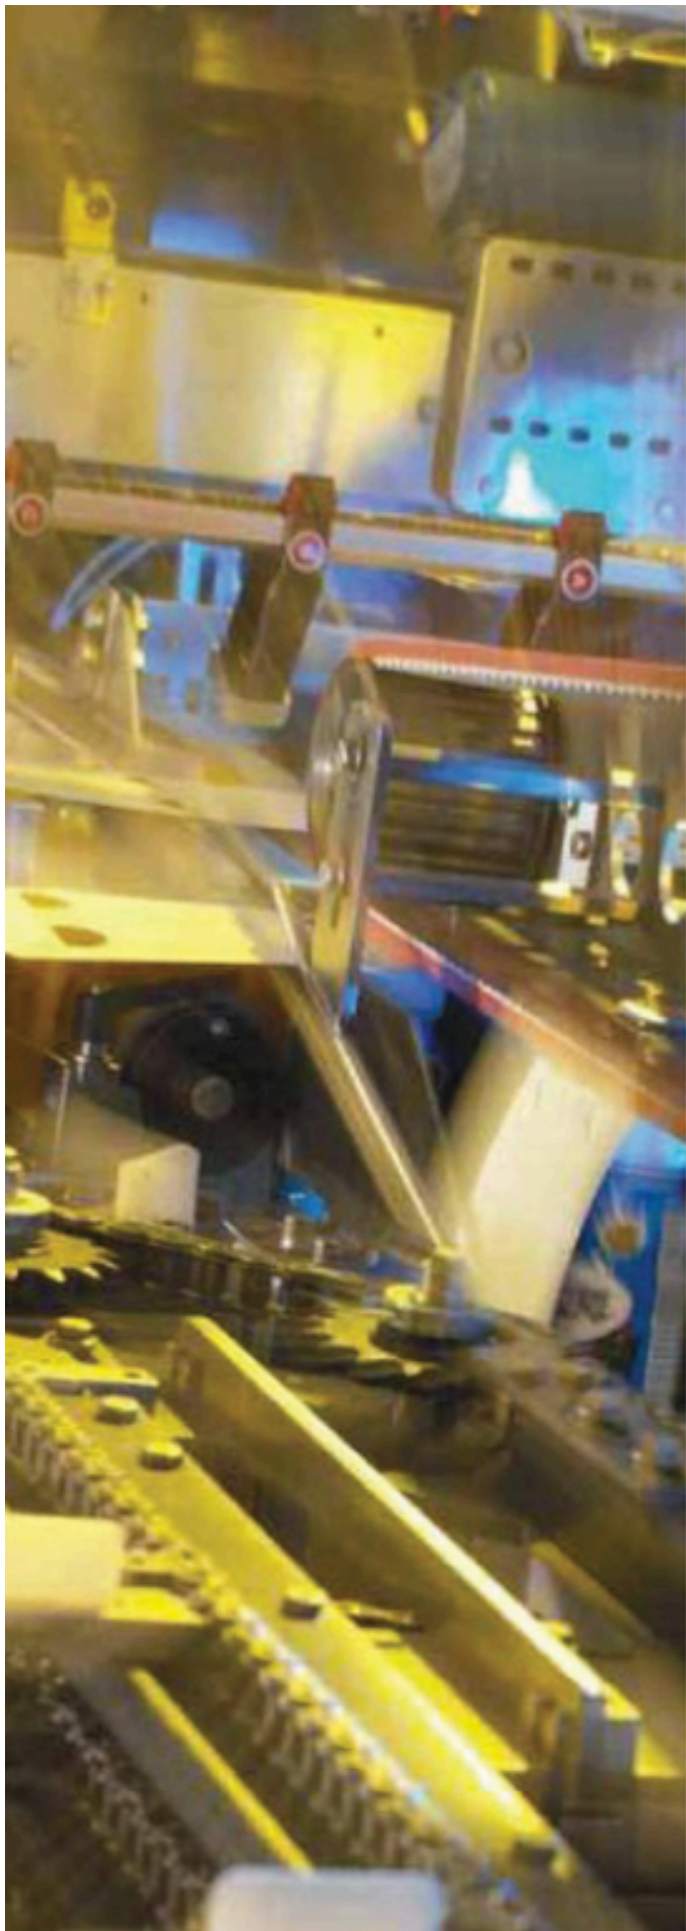

Benefits material costs

Injection moulding containers with topseal and lid Average save of 25% on raw material!

No IML for lid

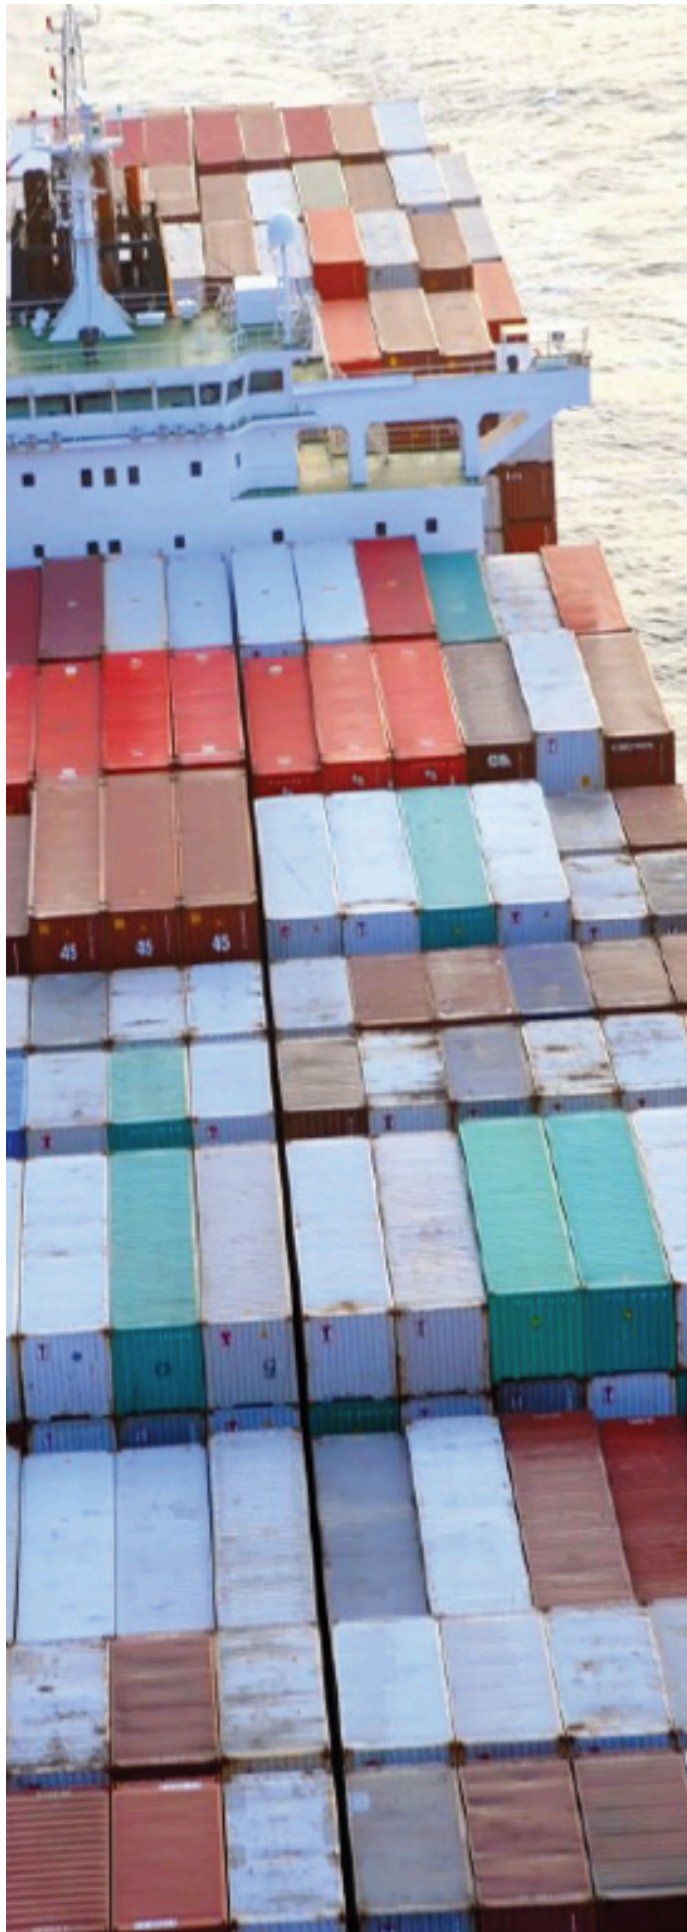

Benefits production

- Saving in energy, investments and higher production output
- Savings on the lid denesting machine: 100%

Benefits logistics

- Transport up to 50%
- Storage up to 50%

Benefits environment

By 10.000.000 packs a total savings of 254 194.01kg CO₂e is achieved by moving from the GP to the NP pack. This is a savings equivalent to 190 Fiat 500 TwinAir cars driving an average of 15 000km/year

Benefits environment

- Energieverbruik oude situatie 2,25kWh/kg
- Energieverbruik nieuwe situatie 1,20kWh/kg
- Een besparing van **47%**
- Jaarlijks zonne-energie van eigen dak 2.000.000 kWh

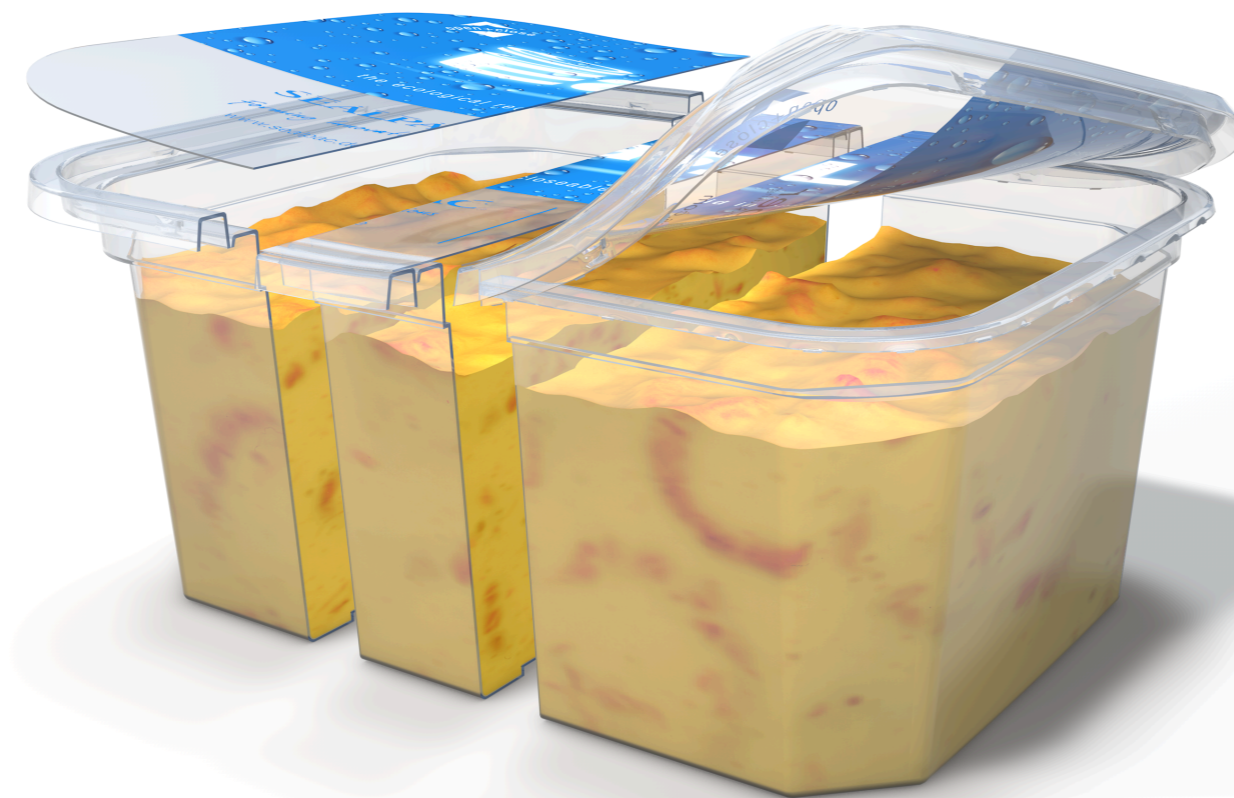

Summary of benefits

- lid Average save of 25% on raw material!
- No IML for lid
- Very clear lid in transparent packaging
- Very easy to open & close
- Saving in energy
- Saving in future investments
- Higher production output
- Savings on the lid denesting machine: 100%
- Transport up to 50%
- Storage up to 50%
- Weight saving injection moulding lid up to 50%
